

Save energy, money, and the environment with these tips.

START NOW! Every step helps stop global warming, promotes cleaner air, and enhances the comfort of your home. You can save up to 30% on energy costs, while helping to protect the environment, by using the following tips:

- ▶ Invest in an ENERGY STAR® qualified programmable thermostat to regulate your home's temperature. Adjusting your home's usual temperature by as little as 5 degrees while you're away or asleep adds up to significant savings each year in cooling and heating costs, without sacrificing comfort.
- ▶ Weatherize your home to save up to 10% on your energy bill. Purchase an inexpensive weatherization kit to seal air leaks through holes and cracks around windows, doors, light fixtures, and walls.
- ▶ Reduce your hot water usage to see savings of up to 10%. Lower your water heater from 150° to 120°, wash your clothes in cold water, and take a short shower instead of a bath.
- ▶ Replace conventional light bulbs with ENERGY STAR qualified compact fluorescent bulbs (CFLs), which are 75% more efficient.

New Jersey's Clean Energy Program

Join the thousands of New Jersey residents who have taken advantage of the programs, services, and incentives offered by *New Jersey's Clean Energy Program* that save energy and money, and reduce greenhouse gases. Now, more than ever, it makes good sense to adopt energy-efficient practices, install energy-efficient equipment, and support and install renewable energy systems. Not only will your home improvements contribute to the economy and environment of New Jersey, you'll also realize bottom-line savings for yourself and your family.

Investing in *New Jersey's Clean Energy Program* gives residents the opportunity to help reduce energy usage and lower greenhouse gas emissions and is an important part of the Governor's Energy Master Plan to reduce overall energy use 20% by 2020.

Your Power to Save
njcleanenergy.com
New Jersey Board of Public Utilities

Thousands of New Jersey residents are LOWERING their energy bills, REDUCING their energy usage, PROTECTING the environment, and MINIMIZING greenhouse gas emissions. You can too – New Jersey's Clean Energy Program makes the power to save energy and the environment easier than you think.

Home Performance with ENERGY STAR

Save up to 30% or more on your home energy costs and increase the comfort, safety, and durability of your home. Work with a contractor who is accredited by the Building Performance Institute, as part of New Jersey's **Home Performance with ENERGY STAR**. Learn about money-saving improvements, such as insulation, energy-efficient lighting and appliances, and high efficiency heating and cooling systems. Incentives, including low-interest financing, are available to help you get the work done.

CleanPower Choice Program

Choose CleanPower. Sign up for the **New Jersey CleanPower Choice ProgramSM**. It's an easy way for you to choose electricity generated from clean, renewable power sources such as wind, solar, hydro, and landfill gas power. There's nothing to install, you are already set to go. Sign up for **CleanPower** and help REDUCE our dependence on fossil fuels, PRESERVE our climate and shoreline, and MAKE the choice for a cleaner tomorrow.

WARMAdvantage & COOLAdvantage

Replace your old furnace, water heater, or central air conditioner with a high efficiency model and get a rebate through NJCEP's **WARMAdvantage** and **COOLAdvantage** programs. Heating and cooling systems account for the largest portion of your energy bill. Get a rebate when you install qualifying high efficiency equipment and you will also reduce your energy costs and improve the quality of the environment.

New Jersey ENERGY STAR Homes

Build better with ENERGY STAR. **New Jersey ENERGY STAR Homes** are built to be at least 15-35% more energy efficient than standard homes. That means you will enjoy greater year-round comfort, quality, and savings on your energy bills for years to come. Third-party testing and verification helps ensure homes are built to meet the U.S. Environmental Protection Agency (EPA) strict guidelines for superior energy performance. Best of all, any home in any size or style can be an ENERGY STAR home.

ENERGY STAR Qualified Products

Install ENERGY STAR qualified products throughout your home. Products with the EPA's ENERGY STAR label use up to 50% less energy. ENERGY STAR qualified products include lighting, appliances, home heating and cooling equipment, and more. Think before you buy and look for the ENERGY STAR label to save. Go to NJCleanEnergy.com to learn about money-saving offers.

Renewable Energy Incentive Program

Harness the power of renewable energy with financial incentives to reduce the up-front installation costs for solar, small wind, and sustainable biomass residential and commercial systems.

See what else New Jersey's Clean Energy Program can do for you.

- ▶ Analyze your home energy use. Find out how you can save energy in your home with the **Home Energy Analysis** – a free, customized home energy audit – online at NJCleanEnergy.com.
- ▶ Through the **New Jersey Comfort Partners Program**, income-eligible households receive free installation of energy efficiency measures, upgrades, and equipment.
- ▶ Use our energy calculators to help identify **energy-saving opportunities** in your home.

Remember, the power to save is in your hands. Get started today: visit NJCleanEnergy.com or call 1-866-NJSMART.
